

**Randy Barnes**  
Chief Operating Officer  
Unifi Technologies, Inc.

Mr. Randy Barnes is Chief Operating Officer of Unifi Technologies, [www.unifitech.com](http://www.unifitech.com), spearheading all areas of Research and Development on its cloud based Electronic Medical Records solution, Unifi-Med. Mr. Barnes has served in senior management and leadership roles for Fortune 100 companies, small technology firms and technology start-ups for over 15 years. His extensive experience working with cloud based computing solutions for large organizations in the early stages of development, to the development of new types of cloud solutions in small companies, has given him expertise in this rapidly growing technology and practical knowledge of its role in the marketplace. Mr. Barnes has spent the last several years focused solely on the role of cloud computing solutions as used to enhance healthcare technologies specifically to both improve access to information as well as, improve the interaction between patient and provider. Mr. Barnes continues to provide consulting services and educate healthcare providers seeking an understanding of the changing landscape brought on by government regulation and technology. Mr. Barnes resides in Bend, Oregon.
